Preface

The main objective of any computer science student is to get practical knowledge as possible. Being able to have a practical knowledge by developing a project is a lifetime experience. As practical knowledge is important as theoretical knowledge we are thankful of having a project.

Through the development of the project we had a great experience of various strategies that can be applied in development of the project. This project is the stepping stone for our career.

We are pleased to present this project report. Proper case has been taken while organizing the report so that it is easy to comprehend. Also, various software engineering concepts have been implemented.

Acknowledgment

We are student of BCA sem-5 Studying in the Kamani Science College Amreli. We Thanks to the entire person who has given their Support in shaping of the system.

We thank Mr. Vipul sir Baldha and Ravi Sir Joshi for giving us guidance and co-operation in understanding the system. We also thanks them for their unconditional help in making of this project.

We have great deal of gratitude towards our head of department who encourages in taking up this activity. We thank all faculties and administrative staffs of the institute.

I am also thankful to all those friends who have helped me in this endeavor either of indirectly & especially my family.

Thanks to all!!

Senjaliya Nisha

Abstract

The export system Export are goods and services that are produced in one country or state and sold to buyers in another. Export along with imports, make up international trade. Export Services is exporting goods and receiving orders from customers ,managing customer support and finance. In this way the employer gets best goods and services and the Exporter earn money.

Using this service/System customers can order goods from an part of the India and get customers support for delivery.

First we have found that online export service and get it information .So we try to make a project on export system website through which customer can get and use our website.

using our Export System user can get a estimate easily before purchase a product and after user choice purchase or not.

Introduction

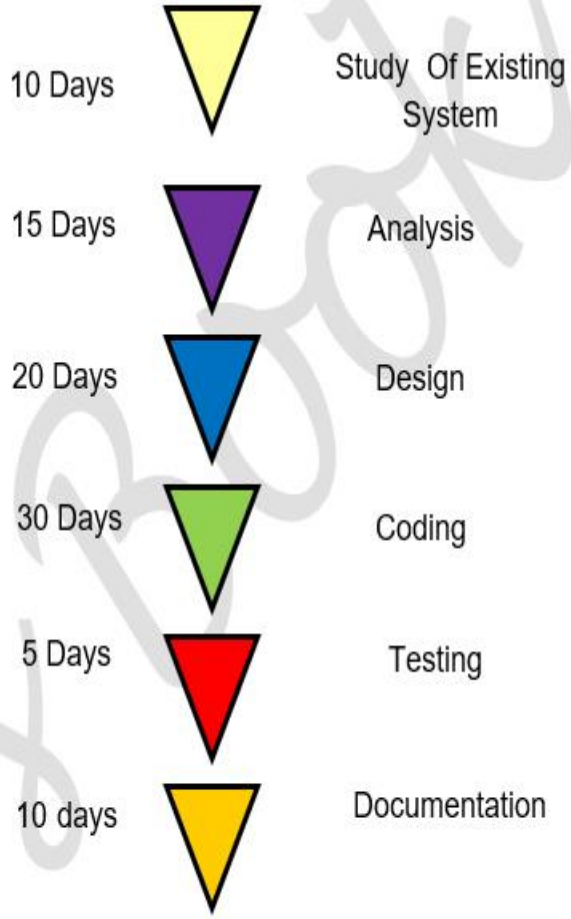
Actual In India , the import and export are regulated by the Foreign Trade (Development and Regulation)Act,1992. Improving our business through this website. Admin means we can add products/goods on this site and after login in our website user can show products and they want to check a total estimation before purchase a product. Estimation get by price by user input quantity if the user interested in our website they can purchase it..

Customers demands are based on a variety of aspects of the chosen location Including culture ,architecture, food, infrastructure ,geography and so on these Qualities draw visitors to the site and enhance the entire travel experience.

Our site name is Skyline Export System its provide a best platform to the buyer/customer to purchase the best and we can try to provide the best services. In reality of export management we can not generate or manage a shipping bill we had a CHA(custom house agent) it is a act as a business relating export the good on custom station. And many export companies rules are payment method are only Bank to Bank .

Time Line Chart

Each Segment Specify a Day.



Project Profile

➢ **Project Name:**	Skyline Export System
➢ **Developed By:**	Senjaliya Nisha
➢ **Front End Tool:**	PHP , JavaScript , Bootstrap
➢ **Back End Tool:**	PHP , MYSQL
➢ **Operating System:**	Microsoft Windows7 & Microsoft Windows10
➢ **Computer System:**	Pentium-IV or higher, RAM-256MB
➢ **Project Details:**	Provide goods and services that are produce in one country/state and sold to buyer in another. The purpose of project can manage all detail of exported products.
➢ **Completion Time:**	3 Months
➢ **Guided By:**	Mr. Vipul Sir Baldha & Mr. Ravi Sir Joshi
➢ **Submitted By:**	Saurashtra University, Rajkot

Hardware Requirement

- 512+ MB Of RAM
- Multimedia Keyboard And Mouse
- GHz Processor
- Monitor
- Printer

Software Requirement

- **Operating System :** Microsoft windows 7 & Microsoft windows 10
- **Front End Tools :** PHP , JavaScript , CSS , Ajax , Visual Studio 2013
- **Back End Tools :** PHP MySQL
- **Documentation Tool :** Microsoft word 2010
- **Browser Specification :** Google Chrome , Mozilla Firefox

Requirement Specification

In this section provides requirements overview of the system.

- **Registration :**

  - **User :**

    If customer wants to Get goods then must be registered, unregistered customer can’t get a goods and services.

- **Login :**

  Customer login to the system by entering valid user id and password for the use important functionality of system.

- **Show products:**

  Admin can easily post goods in this system.

- **Purchase product:**

  Customer can easily get goods using this system.

- **Give Payment:**

  Customer gives a 40% advanced payment.

Project Problem Definition

- Maintain User Profile
- Maintain Project Filter
- Maintain Payment
- Maintain Shipping Bill
- Maintain custom house agent(CHA).

Project Planning & Scheduling

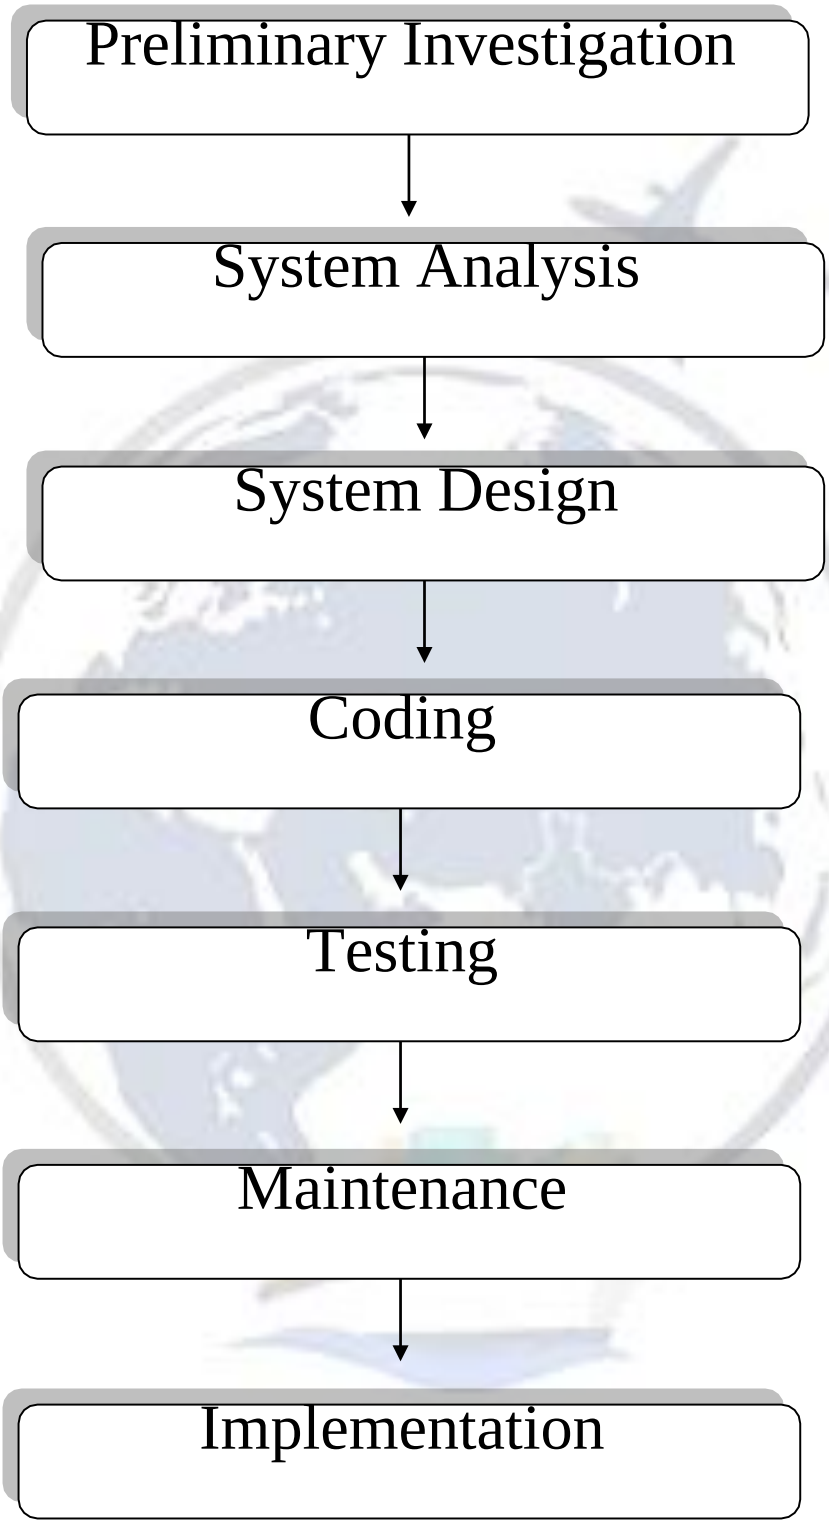
The export system Export are goods and services that are produced in one country or state and sold to buyers in another. Export along with imports, make up international trade. Export Services is exporting goods and receiving orders from customers ,managing customer support and finance. In this way the employer gets best goods and services and the Exporter earn money.

Using this service/System customers can order goods from an part of the India and get customers support for delivery.

First we have found that online export service and get it information.So we try to make a project on export system website through which customer can get and use our website.

using our Export System user can get a estimate easily before purchase a product and after user choice purchase or not.

- Project Planning & Scheduling as under :



System Analysis

System analysis is the process of identification of objectives and requirements, evaluation of alternative solutions andrecommendation for a more feasible solution. In other words, system analysis is the step by step process of gathering, recording and interpreting facts. The main aim of analysis is to determine problem areas and to take solutions to reduce or eliminate them.

- System analysis itself breaks into two stages:

1. **Preliminary analysis :**
2. **Detailed analysis :**

During analysis, data are collected from the available files, decision points and transactions of the systems using various tools like Data Flow Diagram (DFD).

Feasibility Study

A purpose of feasibility study is to check out the possibility of a computerized solution to the organization's observed problem before very much money that has been spent on.

A feasibility study is carried out to select the best system that meets performance requirements. Only by spending the time to evaluate the feasibility do I reduce the chances for extreme embarrassment at later stage of the system project.

For the complete feasibility study I need to concentrate on following area:

- They are three types of feasibility Study :

1. Technical
2. Operational
3. Economical

➢ *Technical :*

Technical feasibility considers whether the desired project can be completed within the framework of available technology. As our project was website designing, this was not much of a problem, as many advanced web-editing tools are available.

➢ *Operational :*

Operational feasibility was done to assure that the product that would be developed would be used. Since a cards and gifts have to have a website of its own sooner or later, that wasn't much of a problem.

➢ *Economical :*

Our Commercial Website is Economically Feasible Because. We have developed this website only for one time. Only future enhancement is required on the other hand every client can view our site any time or many time as per their requirement. So the future economical expenses are null. So we can say that this website is totally economically feasible.

Data Dictionary

The data Dictionary is a set of table. MySQL uses it to maintain information about this own database.

- **Data dictionary contains the following information :**

  - ✓ Name of the table of database.
  - ✓ User information such as privileges.
  - ✓ Name and data-type of all columns in database table.

❖ **Database Name :** skyline export

1. Admin _login :

This table is used to store admin information.

Field	Data Type	Size	Attribute
a_id	Int	11	Primary Key
a_uname	Varchar	50	-
a_password	Varchar	100	-

2. **users registration :**

This table is used to store user registration information.

Field	Data Type	Size	Attribute
r_id	Int	11	Primary Key
r_fname	Varchar	50	-
uname	Varchar	100	-
password	Varchar	10	-
r_email	Varchar	50	-
r_phoneno	Varchar	12	-
r_address	Varchar	200	-
r_country	Varchar	50	-
r_state	Varchar	50	-
r_city	Varchar	50	-
r_zip	Int	6	

3. **estimate :**

This table is used to get a estimate of selected product.

Field	Data Type	Size	Attribute
id	Int	11	Primary Key
fname	Varchar	50	-
mobile	Varchar	12	-
email	Varchar	100	-
quantity	Varchar	200	-
price	int	100	-
location	Varchar	200	-
total	Varchar	50	-
u_id	Int	11	Foreign Key

4. **product :**

This table is used to store all information about work application.

Field	Data Type	Size	Attribute
P_id	Int	11	Primary Key
p_name	Varchar	50	-
p_image	Varchar	200	-
p_price	Varchar	100	-
p_desc	Varchar	200	-
p_date	Date	-	-

5. This table is used to purchase product/goods.

Field	Data Type	Size	Attribute
Id	Int	11	Primary Key
name	Varchar	50	-
product	Varchar	200	Foreign Key
price	Varchar	100	-
unit	Varchar	200	-
country	Varchar	100	
date	Date	-	-
contact	Int	12	-
email	Varchar	100	-
total	Int	50	-
p_id	Int	11	Foreign Key

6.Contact :

This table is used to send message to admin.

Field	Data Type	Size	Attribute
Id	Int	11	Primary Key
uname	Varchar	50	-
email	Varchar	100	-
subject	Varchar	50	-
message	Varchar	200	

7.payment :

This table is used to give payment.

Field	Data Type	Size	Attribute
id	Int	11	Primary Key
name	Varchar	50	-
Payment_status	Varchar	100	-
Transactin_id	Varchar	50	-
date	Varchar	200	-
amount	Varchar	200	-
u_id	Int	11	Foreign Key

Data Flow Diagram

The DFD gives brief idea on how the designed system is working. It also suggests to us the type of users who using this system and the process involved in the system.

Future Scope

The main future scope in this project is The Performa invoice and document delivery details should also be maintain by the application.

The application would provide the different levels of authentication.

In future we involve a CHA(custom house agent) because he manage A shipping bills and other like transport a one port to another port by using the services like by sea ,by airfreight , by cargo.

In future We try to export other best products not only pulses ex . aayurved Products etc..
